SCHOOL YEAR 1884-85.

# REPORT.

The following is the report of your committee :

The schools, during the year, have done fairly well, but the standard taken is far below that which should have been with the amount of money expended.

During the year the "Gage School Fund" became available, the interest of which amounted to four hundred and fifty-four dollars and seventeen cents, (\$454.17), apportioned by the selectmen as follows, the basis of apportionment bring all children between the ages of 5 and 15 in town the first day of April:

DISTRICT.	NO. OF SCHOLARS.	AMOUNT.
No. 1, -	16	\$43 00
" 2,	8	21 50
" 3,	31	83 31
" 4,	19	51 06
" 5,	13	34 94
" 6,	7	18 81
" 7,	29	77 94
" 8,	7	18 81
" 9,	23	61 81
" 11,	6	16 12
" 12,	10	26 87
<hr/> Total,		<hr/> \$454 17

Each scholar received \$2.68 7-10. As this sum was interest for less than a year we shall receive in the future a larger amount.

It must be apparent to every one that a different distribution of the school money should be made, so that each scholar may have at least an equal number of weeks schooling.

This year, District No. 3, received over one-fifth of the "Gage Fund," with a prospect in the near future of increasing that ratio; in 1879 this district had only 14 scholars between the ages of 5 and 15; in 1884, 31 between the same ages, a gain of 17. Most of the other districts have decreased, notably in District No. 4, which, in 1879, had 24 scholars, and in 1884 but 19; the coming year the number will not exceed 12.

It is not economy to be narrow minded in the education of our young, for upon them the future welfare and good name of the town depends. Is it not, then, plainly our duty to fit them for this work to the best of our ability?

Your committee does not see any better way out of this dilemma than to abolish the present system and adopt a better one. It may not be generally known that the district system is a more recent one than the town, but such is the fact.

Your committee thinks there is a need of a higher grade school. Quite a number of our school children are attending higher schools and many more would gladly avail themselves of the privilege if the town would give them the proper opportunity and encouragement.

## TEACHERS.

Although our teachers have been as good, perhaps, as the average country teacher, yet they should be still better. What seems most needed is a special training for school work. It might oblige us to pay higher wages but the improvement in our schools would make it a good investment.

The examinations of teachers only tests the scholarship of the candidates and does not necessarily prove their fitness to teach.

The natural tact to teach should be supplemented by proper training. Lawyers, physicians, ministers, mechanics and artisans are obliged to undergo a course of study and training before being allowed to ply their vocations. But no one compels you to consult any particular lawyer or physician, or attend any particular church, nor employ any particular mechanic or artisan to build your house or construct a machine. And yet, in educating your children, you are obliged to send to a certain school or lose the benefit of the tax which you are compelled to pay, therefore, the town or state is in duty bound, since it compels you to send to the school for which you pay a tax, to see that the teachers who teach them are well qualified.

It is the conviction of your committee that all district teachers, at least, should be examined by a board of education, independent of the town, thereby preventing much that is under the present law very perplexing and unsatisfactory.

No change has been made in text-books during the year. Colburn's Mental Arithmetic has been reintroduced with excellent results, notably in District No. 12, where nearly the whole school became interested.

No text-book on Physiology relating especially to stimulants and narcotics, has been decided on, but in one school we have at present a class using Hutchins' Laws of Health.

## SCHOOL-HOUSES.

District No. 2, school-room is unfit for use and should be repaired as soon as possible.

Improvements have been made in the following districts: No. 1, well dug and pump placed therein; No. 6,

new plastering, paint and paper; No. 9, about 100 square feet of black-board and seats re-arranged.

More black-board surface is needed in Districts Nos. 2, 5, and 7. Most of the school-rooms need better ventilation, and thermometers should be placed in all rooms so that teachers may keep a more even temperature. Some schools, the past winter, have been much interfered with by irregular attendance caused by scholars taking cold while in the school-room.

The money for schooling during the year was as follows: Apportionment required by law, \$1,284.50; literary fund, \$101.49; dog tax, \$46.96; extra, \$48.75; "Gage Fund," \$454.17; making a total of \$1,935 87. This does not include money from Amherst or Bedford. No. 6 received from Amherst about \$20.00; No. 12 from same town, \$29.71; that from Bedford not known by your committee. Districts Nos. 9 and 12 raised extra school money as follows: No. 9, \$25.00; No. 12, \$26.87, which is included above. The following districts raised extra money for repairs and improvements as follows: No. 1, \$35.00; No. 6, \$44.44; No. 7, \$30.00, and No. 9, \$25.00; all of which have been well expended.

During my term of office, as committee, the town has cheerfully met every request for money to furnish needed books and supplies. There are many other things that might be of use, for which, a portion of the "Jane N. Gage Fund" might be applied.

The following tables of studies and statistics will inform you, to a greater extent, of the work done. Thanking you for the uniform courtesy shown me in the past, this report is respectfully submitted.

WARREN W. PILLSBURY,  
SUPT. SCHOOL COM.
